OMNISOURCE

Welcome to OMNISOURCE

OmniSource is a groundbreaking cross-chain decentralized exchange (DEX), set to revolutionize the cryptocurrency trading landscape.

OmniSource seamlessly integrates 20 blockchains, offering a flexible and efficient cross-chain swap solution, and establishing new standards for traders and liquidity providers across multiple blockchain ecosystems.

The Problem - Cross Chain Challenges

In the crypto trading space, challenges like insufficient liquidity, significant slippage and persistent security concerns hinder traders. However, the future lies in cross-chain solutions, and OmniSource is here to address these issues head-on.

Omnisource Solution

OmniSource tackles these challenges through its unique cross-chain capabilities.
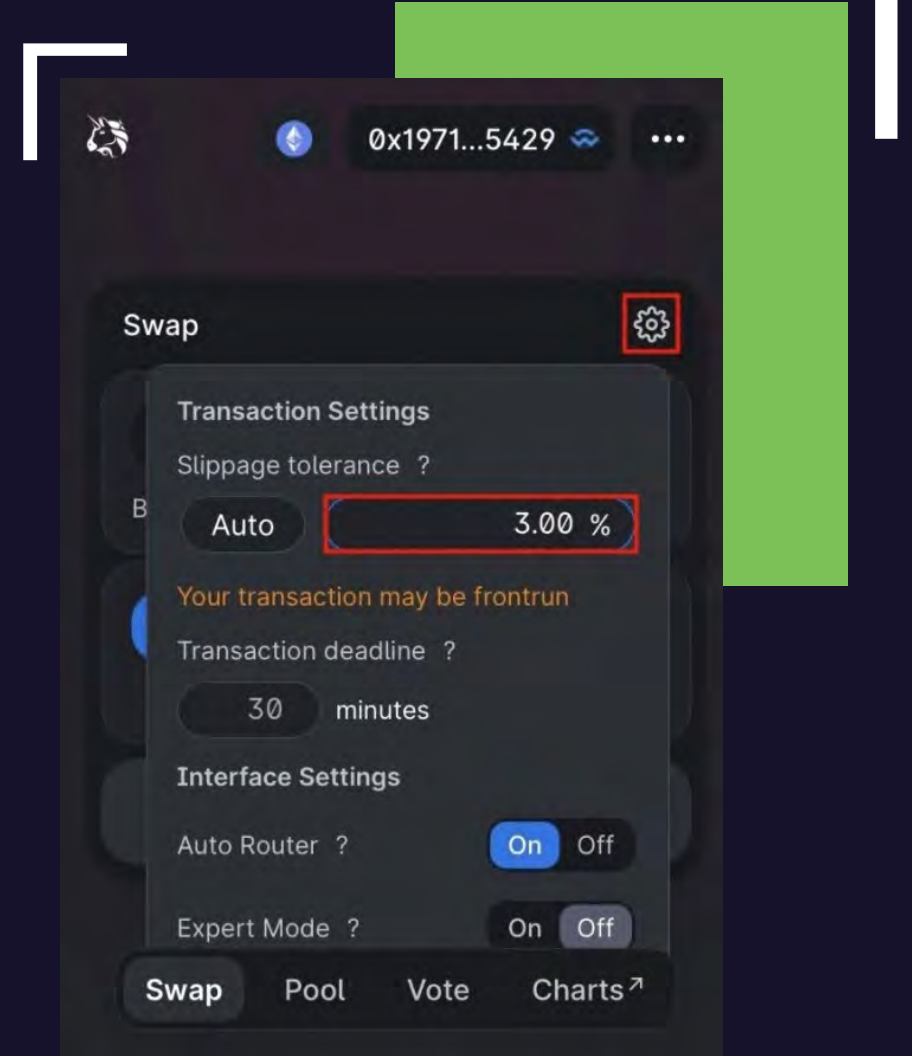

By seamlessly integrating 20 blockchains.

Providing unparalleled liquidity across ecosystems, minimizing slippage.

Our robust security measures ensure the safety of assets, making cross-chain trading safer and more efficient.

Market Opportunity- The Growing Market

The market potential for a cross-chain DEX is enormous and rapidly expanding. As the cryptocurrency sector continues to surge, the demand for efficient and secure cross-chain trading solutions becomes ever more apparent.

With the total crypto market capitalization surpassing $1 trillion OmniSource is strategically positioned to seize a substantial portion of this evolving market.

The remarkable growth seen with platforms like Uniswap(110x), demonstrates the immense possibilities. In a market that's down, the only direction is up, making it an opportune time for investment in Omnisource.

DEFI DEX MARKET SIZE

Investing in OMNI tokens offers the potential for significant returns in the cross-chain DEX sector, as OmniSource continues to innovate and expand, providing investors with a unique opportunity for financial growth.
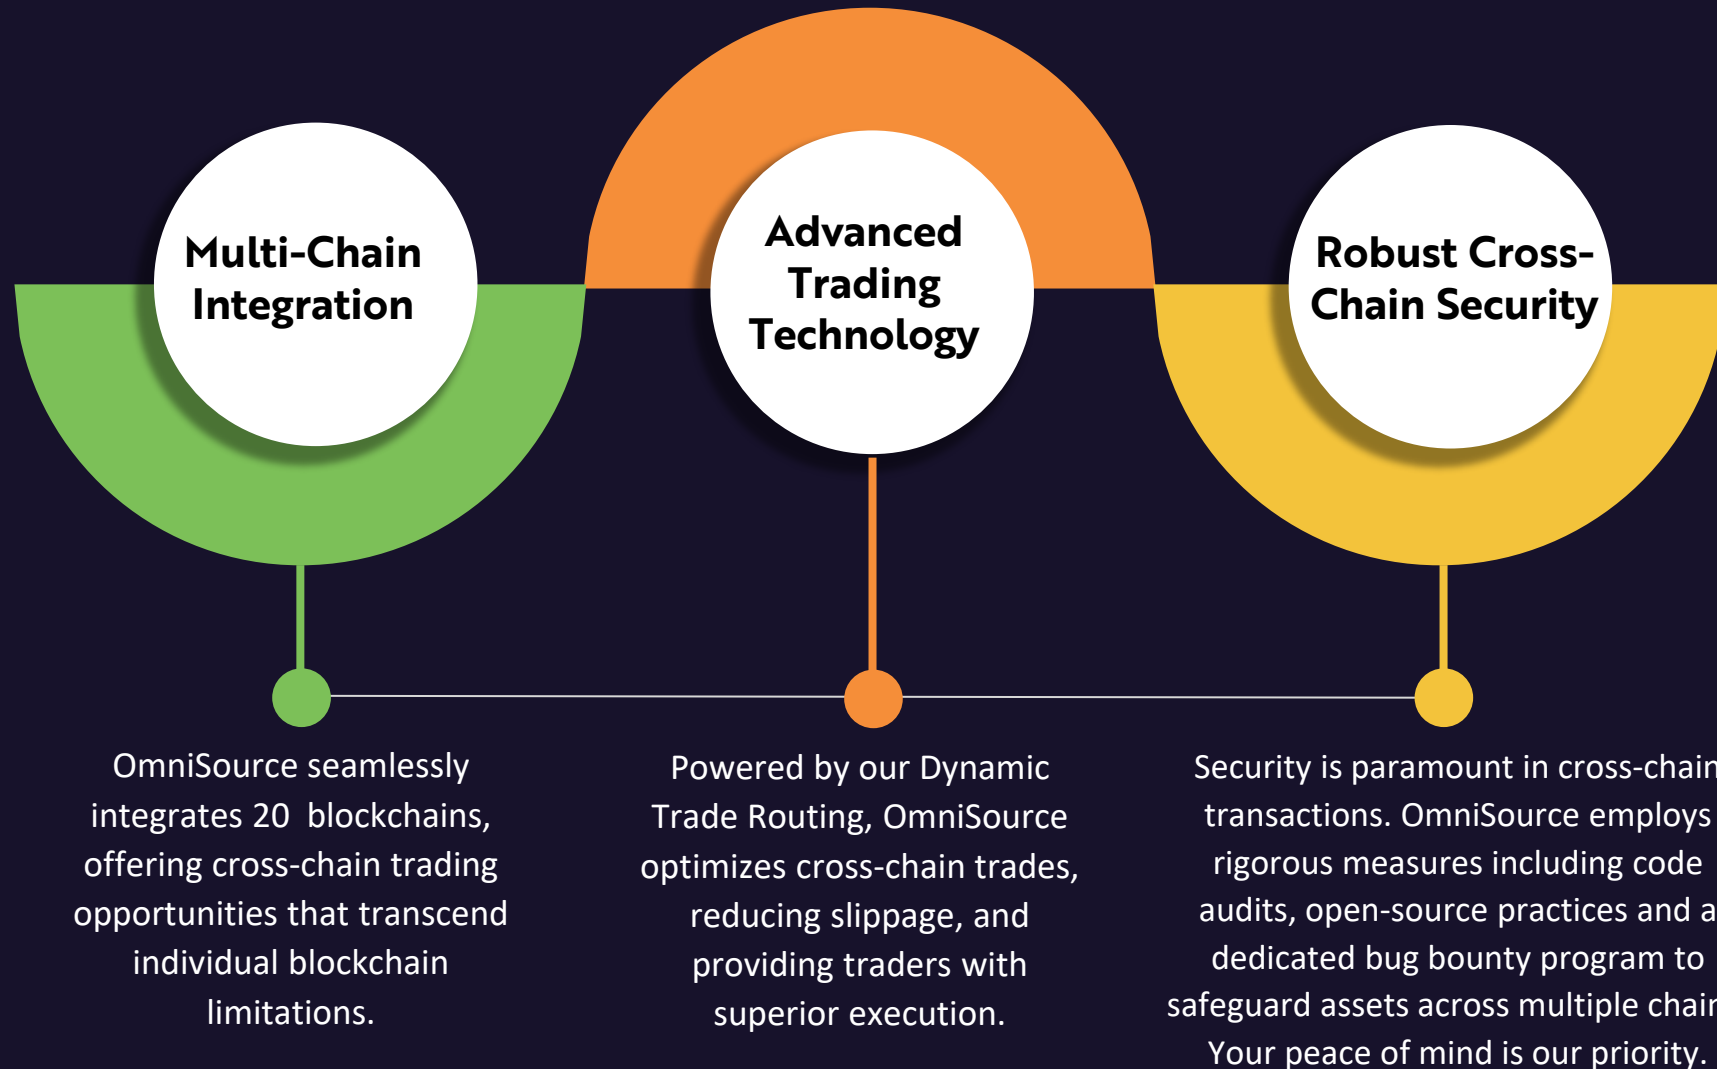

Beginning 2016 MCAP $0

Current DEX MCAP $12 Billion

Projected DEX MCAP $1 Trillion 2025

Omnisource Features That Matter

OmniSource's key features are tailored for the cross-chain landscape:

Multi-Chain Integration

Advanced Trading Technology

Robust Cross-Chain Security

OmniSource seamlessly integrates 20 blockchains, offering cross-chain trading opportunities that transcend individual blockchain limitations.

Powered by our Dynamic Trade Routing, OmniSource optimizes cross-chain trades, reducing slippage, and providing traders with superior execution.

Security is paramount in cross-chain transactions. OmniSource employs rigorous measures including code audits, open-source practices and a dedicated bug bounty program to safeguard assets across multiple chains. Your peace of mind is our priority.

How it Works- Seamless Trading Experience

OmniSource's cross-chain platform delivers exceptional advantages to both traders and liquidity providers:

Expanded Asset Universe:

Traders gain access to a diverse range of assets from various blockchains, increasing trading opportunities.

Enhanced Liquidity:

Cross-chain liquidity provides traders with deeper markets and increased trading volumes.

Reduced Slippage:

Our cross-chain technology minimizes slippage, ensuring traders get the best possible prices for their trades.
Security and Transparency:

Trade with confidence, knowing that our platform prioritizes security and offers transparent transactions across chains.

How it Works Seamless Trading Experience(Cont.)

For Liquidity Providers:

Diversified Income Streams:

Liquidity providers can offer assets on multiple blockchains, earning fees from various sources.

Compounding Earnings:

Automatic compounding of trading fees boosts your earnings over time with minimal effort.

Protection Against Sniping Attacks:

Our anti-sniping feature safeguards your assets, providing peace of mind.

OmniSource's cross-chain platform empowers both traders and liquidity providers with increased opportunities, efficiency, and security.

Roadmap – Our Path to Success

OmniSource's roadmap is a blueprint for our journey to innovation and growth, spanning both pre-launch and post-launch phases:

Phase 1

Pre-Launch Milestones: Building the Foundation

- Develop core infrastructure for cross-chain trading.
- Conduct rigorous security audits.
- Establish strategic partnerships with key blockchain projects.
- Explore opportunities for potential Centralized Exchange (CEX) listings.

BITTREX

Phase 2

Ensuring Security and Transparency

- Launch comprehensive bug bounty programs.
- Implement on-chain and open-source practices.
- Engage the community for feedback and continuous improvement.

Phase 3

Creating User Adoption and Awareness

- Launch targeted marketing campaigns to raise awareness
- Educate the crypto community about the benefits of cross-chain trading.
- Foster a vibrant community of early adopters.

Token Launch on PinkSale:

- Conduct a successful token launch on PinkSale, ensuring a fair distribution.
- Engage with the PinkSale community to build trust and transparency.
- Prepare for the next phase of our journey with OMNI token in hand.

PinkSale **token**

Roadmap – Our Path to Success (Cont.)

Phase 4

Premium Platform Features

- Roll out advanced trading tools and features.
- Enhance the overall user experience.
- Achieve a significant increase in the active user base.
- Pursue potential Centralized Exchange (CEX) listings.

BYBIT   **KUCOIN**

Phase 5

Community Growth and Expansion- Target 100M dollar Market Cap

- Foster community growth and engagement with the OMNI token.
- Expand the range of supported assets and blockchain chains.
- Explore additional opportunities for Centralized Exchange (CEX) listings.

BINANCE   **OKX**

Phase 6

Partnerships and Collaborations Target 500M dollar market cap by Q1 2024.

- Forge strategic partnerships with prominent blockchain projects.
- Collaborate with DeFi protocols to enhance liquidity.
- Explore possibilities for cross-chain DeFi integration.
- Strengthen collaborations with Centralized Exchanges (CEXs).

OmniSource's roadmap charts a clear path to delivering a secure, efficient, and innovative cross-chain trading experience. With the successful token launch on PinkSale, we are poised to take the crypto trading world by storm as we continue on this exciting journey to success.

OmniSource is gearing up for a dynamic marketing campaign set to propel our cross-chain DEX to new heights. With upcoming listings on CoinMarketCap and Coingecko, we're expanding our global presence.

Our aim is to secure the top position on CoinMarketCap, dominate Coingecko in the USA, UK, and Asia, and gain visibility with top rankings and upvotes on Dextools.

OmniSource is also poised to trend worldwide on Twitter, solidifying our presence in the crypto community. Stay tuned for these exciting developments as we reach new milestones in the world of decentralized trading.

Tokenomics - The OMNI Token and Its Role in OmniSource's Cross-Chain Ecosystem

The OMNI (OmniSource Governance and Utility) token plays a central role in the OmniSource cross-chain ecosystem, offering various utilities and serving as a catalyst for growth.

1

Trading Fees:

OMNI tokens can be used to pay trading fees within the OmniSource platform, providing users with fee discounts and incentives.

2

DAO Governance:

OMNI token holders participate in governance decisions, proposing and voting on protocol parameters, cross-chain integrations, and future developments.
3

Liquidity Incentives:

Users can stake OMNI tokens to earn rewards through liquidity programs, encouraging participation and liquidity provision.

Distribution

Total Supply: The OMNI token has a finite supply of 1,000,000,000 tokens, ensuring scarcity and value preservation.

Token Distribution: OMNI tokens are distributed across various stakeholders, including:

10% Partnership Tokens - First unlock 14 days then vesting period of 36 months

10% Team Allocation - First unlock 1 month then 24 month vesting period

10% CEX Allocation - First unlock 1 month then 6 month vesting period

5% Advisors - First unlock 1 week then 3 months vesting period

20% Ecosystem Tokens - First unlock 3 months then 36 months vesting period

30% Liquidity pool + Presale Allocation .

15% Token supply to be burnt

OMNI token is the driving force behind OmniSource's cross-chain ecosystem, providing incentives, governance, and utility for users, making it an integral part of the platform's success and growth.

Investment Opportunity - Invest in Omnisource (OMNI)

Investing in OmniSource's OMNI token presents an unparalleled opportunity for substantial returns in the cross-chain DEX ecosystem. Here's why:

Growing Cross-Chain Ecosystem:

OmniSource's unique cross-chain capabilities position it at the forefront of a rapidly expanding crypto landscape. As cross-chain trading becomes the future of decentralized finance (DeFi), OMNI token holders are poised to benefit from the platform's growth.

Trading Fee Incentives:

OMNI tokens offer fee discounts for trading within OmniSource, encouraging users to acquire and hold the token for trading activities. As trading volume increases, so do the potential returns for token holders.

Liquidity Rewards:

Staking OMNI tokens provides an opportunity to earn rewards through liquidity programs. As more users and liquidity providers join the platform, the potential for compounding returns grows exponentially.

Governance Influence:

OMNI token holders have a say in the platform's direction through DAO governance. Being part of the decision-making process allows token holders to shape the platform's future, aligning it with their interests.

Limited Token Supply:

With a finite supply of 1,000,000,000 tokens, scarcity is built into the OMNI token, leading to increased demand and value over time.
